

LIGHTING TOWERS

Very mobile lighting towers with a simple design, easy to use, robust and reliable.

The **Gen Set Lighting Towers** are available with mounting kit, easily suitable for a wide range of single phase and three/single phase generating sets as well as engine driven welders from 5 kVA to 22 kVA powered by gasoline or diesel engine.

They can be fitted on two-wheels trolley or mounted on a site tow undercarriage. Upon request road trailers are also available.

They are also supplied as standalone units fitted on three stabilisers, connectable to the generator single phase outlet or to the mains.

For further information on our products, please contact Gen Set's sales offices directly

Tower Light Features

- Two wheels trolley for an easy manoeuvrability, or, two wheels trailer with towing bar
- Stabilisers ensure secure operation, on flat surface, even in high winds (max 110 km/h - 70 mph)
- 5,5 - 7 - 9 - 15 m telescopic and tilting mast, made by inox, operated by a handle winch which allows infinite variable height adjustments; upon request an hydraulic or electric winch is also available
- 2, 4 or 6 lamps, 500 W or 1000 W each
- Long run fuel tank fitted on the tower light trolley or trailer (available on request)
