Easy installation

Compact

The intercooler W/A assures the perfect functioning of the generator independently from the external environment temperature, therefore the alternator and the engine will work at ideal temperature optimizing the performance and reliability of the genset.

The generator may be installed in any room on the vessel without the need of ventilation blowers.

Extremely compact and quiet, the generator is equipped with a double shock absorbing system to increase comfort: the first one absorbs vibrations from engine-alternator to the frame, the second one absorbs residual micro-vibrations from frame to vessel.

GSi 8.5 K - 9.6 K
